“How To Make 10x Your Money as the \$11 Trillion Bubble Built by Fascists, Communists and Dictators Explodes...”

**FREE REPORT... yours for the asking. Reveals the 9
Best Ways to avoid the coming Inflationary
Catastrophe...**

Dear Currency Capitalist Member,

The last time this bubble imploded was in 1976. The five years that followed were among the most extraordinary in economic history...

- Oil leapt 3-fold.
- Gold leapt 6-fold.
- The Dow plummeted 28% (and took 6 years to recover).
- And inflation ratcheted up to 12%, almost destroying the fabric of the American economy.ⁱ

But this time the **trends will be *bigger* and they will move *faster*...and the fall-out will be *far greater***. By the end of it, the average \$100,000 portfolio will be worth \$48,000 (at best!).

But if you take the simple (but bold) steps set out in this report, you could turn that \$100,000 into \$2.4 million.

Recommendation #1: Short the US Dollar with the Brazilian Real ETF.

Why Brazil?

Because Brazil is in the midst of a great industrial, agricultural and technological transformation...that according to Goldman Sachs will, over the next 40 years see their GDP grow an astonishing 10-fold!

They are quickly becoming not only a leader in energy...but also in agriculture, outsourcing, InfoTech, and telecommunications. Which has sent annual Foreign Direct Investment (FDI) soaring. In the past decade alone FDI in Brazil has gone from next to nothing to tens of billions of dollars a year.

And even through the global financial crisis...Brazil's GDP still expand by 5.1% in 2008. The country is currently the fourth-biggest emerging mega-market on the planet.

But why invest through an ETF?

As a Currency Capitalist member you know ETF's give you an opportunity to invest in currencies without the extreme risk of Forex, Options, or Futures...

And with Brazil set to soar and the T-Bubble ready to burst...you get the safety of ETF's and with potential gains of 25%, 50%, 100%, or even 200%.

Bear in mind this is just one opportunity from this report...there are still 7 additional ways to profit off the T-Bubble...ⁱⁱ
