

Subject line: There was a time...

Dear XXX,

For a time in my life it seemed like every day I woke up I was dogged by excuses...

Millions of reasons for me not to get out of bed...not to work toward my goal of working on Wall street...not to work harder...on and on and on...

Almost every turn I made it seemed like there was always something in my way. Whether it was an actual obstacle...or just an excuse.

My accident changed my life forever, as I'm sure you can understand.

But in a way...without that accident...who knows if I would be where I am right now. Ready to retire before 35 and spend lots of time with my wife and kids.

See from my accident...I got a fear that could conquer any excuse or obstacle in my path. **No matter how painful...how costly...or how scary.**

It made it almost easy to make the tough decisions in life...that stops a lot of people dead in their tracks. I could pull the trigger on trades, trust my research, or even call my clients when things were not going well.

I understand that you don't necessarily have this luxury...if you call it that.

I've seen and read your responses to the questions we asked about retirement and your personal investing.

I can see the urgency in your words, and can see that you know the importance of learning what I have to teach you.

But I also understand the hesitation...with all of the obstacles and excuses...legitimate or otherwise in your life.

I understand that its hard to overcome your own fears about the money this course costs...the time it will take to complete...or the things you'll miss while doing it...

But don't let these temporary...small fears hold you back from a vital, life-changing opportunity.

I'm sure \$995 might as well be a million dollars...for me once it seemed that way too.

But don't just think about today...think about tomorrow as well.

What's more costly...a \$995 investment in learning a strategy proven to build wealth...or not having a nest egg...not being able to supplement your income...not having the skill to pull profits out of the market?

What I am going to teach you changed my life forever. It helped me make my fortune... start IFII with Dylan...and set me up for retirement.

Now you can do the same.
