

# South Florida's Secret Brain-Fortifying Flower

Little-Known Aquatic Flower Helps Build Razor-Sharp “Project Crushing” Focus,  
Precise Lightning Quick Recall, And A Flood Of Ferocious Thought Creating  
Energy...

Dear XXX,

When people come to my house, they tell me, "Your backyard looks like one of those jungles you're always traveling to."

At the edge of the “jungle”, there's a pond. It's about ankle deep with thick vegetation, and plenty of mud and rocks. It might not look like much, but I know it hides a secret.

It's one thing my visitors never seem to notice, but on the south side of the pond you'll find a tiny cluster of white flowers.

In my practice, I've used this aquatic flower for years. But up until last spring I had no idea it was growing around my pond.

When taking the digestible form of this flower, my patients have a precise lightning quick recall, a greater ability to work through mental stress and razor-sharp “project crushing” focus.

I've grown so fond of it, that I've started calling it my “backyard brain-boosting flower.”

It's only recently that it's started getting attention, as universities and drug companies start to investigate. So far, they're confirming what my patients and I already know.

For instance, in a study from Swinburne University in Melbourne, Australia, researchers found people given this little-known aquatic flower significantly improved their spatial memory, memory accuracy and their ability to process visual information in a very short time.<sup>1</sup>

However, that's only the beginning of what you can do to:

**Improve Your Intellectual Capacity, and Concentration,  
While Shortening Your Learning Time...**

If you look hard enough in tropical and subtropical regions of the world, particularly the Americas, you might just find this little-known South Florida “water” plant.

Ayurvedic medicine, the oldest and most revered health system in the world have used it for centuries to beef up protection for the brain, build razor-sharp “project crushing” focus, and speed up your own information superhighway– while shortening learning time.

It’s one of the very best brain-fortifying herbs in the world.

In the study from Australia, they divided participants into two separate groups. One group got 300 mg a day of Bacopa and the other got a placebo.

After 12 weeks, the people taking Bacopa had:

- Better word recall
- Better attention
- Better memory scores
- A greater ability to ignore irrelevant information and focus in like a laser on what they needed to learn

The people taking bacopa also had less anxiety and lower heart rates, while the stress level and heart rates in the placebo group increased.<sup>2</sup>

Research also has discovered that Bacopa can protect you from toxins that are harmful to your brain, like aluminum (long-term exposure of which can increase your risk of Alzheimer’s disease by 60 percent).<sup>3</sup>

Bacopa is so potent because it has many beneficial components like saponins (that protect against infection) and flavonoids (plant antioxidants). It also has two active components called bacosides A and B, which improve the transmission of impulses between nerve cells in the brain, regenerate the connections between your brain cells and help neurons, the brain cells involved in learning and memory, to maintain their healthy function.

With bacopa, you may be able to learn and remember new things much more easily than you ever have before.

It's the perfect brain fortifying herb. That's why I've included it, as one of the eight super plants in my brand new exclusive formula called *Focus IQ*. It’s possibly the strongest natural mental booster ever developed.

TV’s Dr OZ Praises My Backyard Brain Boosting Flower...

“*Bacopa* will make you smarter, enhance your memory, and help you focus better.”

- Dr OZ, on his “Dr Oz Show”

***Focus IQ*** helps you maintain the ability to intensely focus and have instant recall that comes with having a normal, healthy memory; sharpen your focus; rebuild your mental energy; support healthy blood flow to your brain; and protect your cognitive facilities.

The difference in how your brain performs can be staggering. In fact, a very short time after you take ***Focus IQ*** you'll feel a blast of intense focus surge through your mind. It will leave you feeling liberated, and ready to take on the world.

But bacopa is only one of the potent natural brainpower-enhancing I want to show you today. For instance, did you know there's a natural plant that can help make the impossible, possible?

## How You Can Naturally Rejuvenate Brain Cells And Increase Your Mental Horsepower

Do you ever dream of doing what everyone told you that you could not?

That's what Princeton biologists Gould and Gross did, except they proved the critics wrong.

Your whole life you've been told that your brain cells will "die off" as you get older. But what if they didn't have to, and you could rejuvenating these brain cells. Putting your "mental Horsepower" back into fifth gear, where it was when you were younger.

In their groundbreaking Princeton study, Gould and Gross injected 11 adult macaque monkeys with bromodeoxyuridine (a synthetic nucleoside) to label, and track their brain cells.

Upon examination, at pre-determined times, they found a substantial number of these "labeled" cells had both young and old traits. Indicating that adult macaque's actually produce new brain cells, strongly implying—since they are a useful human model—that adult humans do too.<sup>4</sup>

Gould and Goss found you have "growth factors" that decline as you age. When they decline or disappear, they prevent you from growing new brain cells.

The good news is that if you can replace them, you can slow down the shrinking of your brain and start re-growing brain cells.

Gotu kola (a plant native to India, and Sri Lanka) has proven effective in helping to produce more of these growth factors. Helping to maintain and rebuild neurites and dendrites<sup>5</sup>. Two of the most important structures in your brain.

They're the root-like branches that are extensions of your brain cells. Think of them like the wiring of a computer network. They allow one part of your brain to communicate with the other.

A study from the *Melaka Manipal medical College* in India confirms what I've known about Gotu kola extract for years. It helps promote dendrite growth.

They wanted to study the effect Gotu kola has on brain cells, so they gave each rat one body-weight sized leaf of Gotu kola. From this Gotu Kola they found a significant increase in the length and branching of dendrites.<sup>6</sup>

Now, if you wanted to take it a step further, you would want to stimulate the brain to increase the effects of nerve growth factor, which promotes neurite and dendrite re-growth. That's where a special nutrient called acetyl L carnitine comes in.

ALC gives you more stamina and improves mood and memory. It also enhances the release of dopamine from neurons and increases other beneficial brain chemicals.<sup>7</sup>

As I explained, without these growth factors your brain loses important neurites and dendrites, but with these growth factors, you get razor-sharp "project crushing" focus, precise lightning quick recall, and a flood of ferocious thought creating energy.

## Garden Flower Helps Reactivate Your Brainpower with Fresh Oxygen

There's another flower, with beautiful blue petals, that you may have in your garden right now amongst your shrubs and roses.

It contains a powerful natural ingredient which helps increase blood flow. I'm talking about periwinkle. The flower contains a compound called vinpocetine, which has been found to work miracles for the mind.

It's so effective against fading mental powers that it's widely used in nearly 50 countries, including Hungary, Germany, Poland, Russia, and Japan.

Vinpocetine is one of Nature's most potent antidotes to the forgetfulness, brain fog, and confusion we normally associate with aging. You won't have to worry about losing the mental power you've enjoyed your whole life.

The beauty of vinpocetine is that your brain knows exactly what to do with it. Start taking it and it goes to work right away. That's because in your early years, your brain makes it on its own. Think of it as your body's "brain food."

Once you hit early adulthood, though, you don't make as much. You make even less as the years go by. Starved of this key nutrient, your mental abilities begin to fade.

Start feeding your brain again and they come roaring back.

This isn't just about staying sharp. Vinpocetine is a healing force for both your brain and your body. Here's what it can do for you:

- Boost blood flow to your brain.<sup>8</sup>
- Support nervous system health.<sup>9</sup>
- Lower your risk of brain health problems.<sup>10</sup>
- Keep your brain stocked with the “feel-good” compound dopamine, which helps you direct your thinking and behavior – and stay motivated.

A three-month trial conducted by Hungarian scientists confirmed that Vinpocetine actually speeds up the rate of blood flow in your brain – even when you're just sitting around. Of two groups, the one group taking Vinpocetine tested better and appeared more steady and calm.<sup>11</sup>

Another study published by the European Journal of Ultrasound showed that a single dose of vinpocetine increased oxygen to the brain compared to taking a placebo.<sup>12</sup>

And this oxygen boost works wonders for your memory.

For example, a study of older adults published in the *Journal of the Nutraceutical Association* showed vinpocetine significantly improved performance on attention, concentration and memory tests compared to taking a placebo.<sup>13</sup>

With it, you can reclaim lightning quick recall, flood your mind with ferocious thought creating energy and finally harness your untapped intellectual potential for success.

## “Naturally” Upgrade Your Brain To Replenish Your Mental Energy, Sharpen Your Focus, And Give You Lightning Quick Recall...

You've already learned how to use Bacopa, Acetyl L Carnitine, Gotu Kola, and vinpocetine. But there are four other potent brain-fortifying herbs that have helped my patients re-energize their minds and restore a much younger-acting brain:

Sceletium Tortuosum (Kanna): It's been used for hundreds of years by the hunter-gatherer peoples of Africa to elevate mood and reduce stress. Traditional healers use it to treat anxiety, too. It has a component called mesembrine, which studies show may help lessen the effects of stress.

Ginkgo biloba leaf extract: Ginkgo biloba leaf comes from a tree native to China. I've found it that it helps increase oxygen and blood flow to the brain, improve memory, increase alertness and rebuild mental energy.

Baicalin: Baicalin is a very powerful brain protector that helps promote brain cell re-growth and also helps promote better cognitive function. A study from the Kyung Hee University in June 2013 found that baicalin might be useful as a therapeutic agent in improvement of cognitive function.<sup>14</sup>

Omega 3 oil 15mg EPA and 10mg DHA: I'm sure you've heard of Omega 3 oil. But, what you might not know is it works wonders as a brain protector. A UCLA study found omega-3 fatty acids counteract some of the effects of Traumatic Brain Injury<sup>15</sup>.

All eight of these potent brain-fortifying herbs are in ***Focus IQ***, my proprietary formula.

By harnessing the power of these natural herbs, ***Focus IQ*** can help you...

- Build razor-sharp “project crushing” focus...
- Turn your mind into a warp-speed conveyor belt of good ideas...
- Equip yourself with precise lightning quick recall...
- Flood your mind with ferocious thought creating energy...
- Harness your untapped intellectual potential for success...
- Fight off nagging, straining mental stress...

Imagine just wiping away all of the nagging, annoying—even embarrassing moments that your aging brain puts you through. Wouldn't it be great?

With ***Focus IQ*** you can make it a reality and never have to deal with them again.

I've done the work and the research to know these results are possible. I've seen for my own eyes how these brain-fortifying herbs have helped my patients, friends and family for years.

And just last week...after only spending a few days with ***Focus IQ*** ...people around the office have been raving about it.

***Focus IQ*** includes only the very best ingredients with no fillers, toxics, or allergens, and it has been put through a battery of testing that exceeds industry standards.

So you can be satisfied in knowing that what you are taking is not only the best natural brain enhancer...it's also the highest quality.

## Try ***Focus IQ*** Today!

It's hard to put a price on a better brain. The benefits, as I've mentioned already, are staggering.

But I do understand with the way our economy is, the job market and rising prices everywhere every extra dollar in your budget is important.

That's why I've done my best to make **Focus IQ** affordable, because I genuinely care about your health and want you have the opportunity to benefit from **Focus IQ** .

So today, you can get started with **Focus IQ** for my absolute rock-bottom price of \$47.96/ bottle. That qualifies you to be a part of my three-month auto-ship program.

As a valued member of this program, you not only qualify to receive the lowest possible price for **Focus IQ**...but I will also waive your shipping costs each month.

So you will save a total of \$20.94 each month on the on Focus IQ and S&H charges I've waives, just because you are a member of our auto-ship program.

Over three that means you'll save a total of \$62.82, which is like getting your third bottle of Focus IQ free, when you order today.

It's a great deal. But it gets better.

## **My Free Gift To You: Fire Up The Brainpower That Gives You New Ideas, Quick Recall And Laser-Like Focus**

In this report, you'll have complete access to the *simple system* I developed for my own patients to help them preserve their telomeres and *stay sharp, focused, energetic and alert, with total recall at their fingertips.*

Because when you preserve your telomeres, your brainpower improves... you feel on-the-ball... and more importantly, *you're fully aware and in control of your own life.*

In *Ageless Mind*, you'll learn how to avoid the three enemies zapping your brainpower, and how to nourish your brain, preserve your brain cell telomeres, reverse brain cell loss... and in many cases restore youthful brain function.

You'll be able to download my *Ageless Mind* right away. No waiting for the postman to bring your "snail mail." You can get started immediately.

Hundreds of people paid \$29.95 for this exclusive *Ageless Mind* report. But I'd like to give it to you free when you join **Focus IQ**'s 3-month auto-ship program today.

## Here's What You Do Next...

After you've ordered your bottle of *Focus IQ* today, and it arrives at your door...

Immediately open the bottle and take three capsules (you do this once daily).

It might feel strange at first, but what your feeling is a calming but razor-sharp focus falling over your brain. I bet over the next few hours that you'll be able to work faster, follow group conversations much easier, and avoid distractions.

And that's just what you will feel happening.

Even still, if for any reason at all, you feel like *Focus IQ* isn't for you...

Simply return the unused portion – or even the empty bottles -- to me. As soon as I receive them, I'll refund every penny you spend on *Focus IQ today*.

That way you are at no risk, to try *Focus IQ*.

Get started now to build razor-sharp “project crushing” focus, turn your mind into a warp-speed conveyor belt of good ideas, and Flood your mind with ferocious thought creating energy!

To Your Good Health,

{SIGNATURE}

Al Sears, MD

P.S. I personally guarantee that you'll be satisfied with . Instantly you'll feel a jolting warm focus fall over your mind after the first time you take it. Over time you'll notice how it helps strengthen your memory and constantly rebuilds your mental energy.

If doesn't blow you away...and I mean absolutely blow you away...simply return the unused or empty bottles to me. As soon as I receive them, I'll promptly return your money and even cover your shipping and handling.

But even if you change your mind, your copies of *Ageless Mind* (\$29.95 value) are YOURS to KEEP – *no strings attached*.
